#### The figures have not been audited

#### 22. Derivatives

The Group has entered into a number of forward foreign exchange contracts by subsidiaries to hedge the cash flow risk in relation to the variations of cash flows arising from future forecasted transactions.

The forward foreign exchange contracts are stated at fair value using observable market prices in active markets, including recent market transactions and valuation techniques that include discounted cash flow models and option pricing models, as appropriate.

As at 30 September 2024, the contract amount, fair value and maturity tenor of the forward foreign exchange contracts are as follows:

	Contract amount RM'000	Fair Value Assets / (Liabilities) RM'000
Less than 1 year	589,590	(39,194)

Derivatives (which are classified as financial assets/liabilities) categorised as fair value through profit or loss are subsequently measured at their fair values with the gains/losses recognised in profit or loss.

There is no change to the type of derivative financial contracts entered into, cash requirements of the derivatives, risk associated with the derivatives and the risk management objectives and policies to mitigate these risks since the previous financial year ended 30 June 2024.

#### 23. Gains/losses arising from fair value changes of financial liabilities

Other than derivatives which are classified as financial liabilities when they are at fair value loss position, the Group does not remeasure its financial liabilities at fair value after the initial recognition.
